

Help Fund New Software for the Computer Classes!!!

Almost 200 years ago, on *August 15, 1818*, two sentries report sighting a sea serpent swim past Castle Island. Their superior, Colonel Harris, verified the sighting, as did a resident, James Prince. We can only speculate why there have been no more recent sightings, but, consider this as quoted from the NY Times, 12/12/1873:

The history of the sea-serpent is instructive, and furnishes an admirable lesson to giddy and weak-minded monsters, which sacrifice popularity to the temporary gratification of variety and hunger of applause. That the sea-serpent is still so universally admired and sought after is due to his avoiding the snares that have betrayed so many of his weaker brethren. The care with which he has timed his appearances, and the high-bred reserve of his demeanor, have kept up the interest and curiosity of the public. Wiser than some of his rivals, he has never cheapened himself by tiresome iteration, or earned contempt by permitting familiarity.

The Castle Island Sea Serpent has been used as inspiration in the art classroom for the past two years. It has been sculpted, drawn, printed, painted and even tiled. Now we are also using the Castle Island Sea Serpent as a fundraiser for the computer classes. Mrs. Putnam has offered her t-shirt design and will be donating 50% of the net profit to the purchase of new software for the computer room. The school has just received 10 new computers for the Computer room, however, much of the old software is not compatible with the new computers. This fundraiser will enable Mrs. Cleary to purchase the much needed software for her wonderful computer classes. Your help is greatly appreciated.

Name _____ Classroom _____

Black 100% heavy weight cotton t-shirt with white logo

\$16 each (2 for \$30)

Youth Sizes	Qty	@\$16.(2 for \$30)	Total
