

Comparing A New LED Grow Light Using 1-Watt Chips

As an independent distributor of LED grow lights, Grow With LEDs has the freedom to offer the best products from the best manufacturers. Recently, another LED grow light manufacturer entered the marketplace with the new 1-watt LED chip technology. In our in-house benchmark tests, we compared the new product to LGL's 5 mm "XB" LED technology. In our opinion, the new 1-watt chip technology looks good, but falls short on several key points.

	GROW WITH LEDS COOL 400	LED UFO
PEAK LIGHT OUTPUT	2X OR MORE	X
