To Whom It May Concern:

From start to finish, we were pleased with the work ethics and work quality of Jannet Varon of JVA Construction, Inc. Jannet and her architect walked us through the process of the designing, permitting and building of our second story project.

We were happy with the design from the start and Jannet was extremely thorough when it came to deciding upon the many minute particulars of the project. She had numerous suggestions and creative functional ideas. Jannet did not overlook any details. All members of her crew were respectful, tidy and pleasant during the building process. We chose to stay in our home during the project, and surprisingly the process did not feel invasive. Jannet met the timeline she estimated from our initial meeting.

Overall, we are very pleased with the outcome of our second floor addition and we will not look for another contractor for future projects.

Sincerely,

Kristin and Charlie Murphy
