Teacher's Guide to Using the Math Skills Maintenance

In order for their skills to remain fresh, students need opportunities to practice the math skills that they have learned in previous courses. The *Math Skills Maintenance* masters contain pages of practice for various basic math skills. Each page is geared to one or more previously-learned skills.

When to Use These masters can be used as short in-class or take-home refreshers. You may wish to use them before you study related lessons in the Student Edition or at any time during the school year. Correlations showing when practice with each skill may be helpful for studying lessons in *Mathematics: Applications and Concepts, Course 1, Impact Mathematics, Course 1, and MathScape, Grade 6* are provided on pages iv, v, and vi, respectively.

These masters are also available online at www.msmath1.net/math_maintenance.
