

BioMat Statistics

- A 2011 clinical study using brain scans, heart scans and fasting blood tests showed **cortisol levels were reduced** and overall **stress indicators improved by an average of 78%** in test subjects after 2 months of daily BioMat use.
- Comparative thermograms show substantial increases in circulation in neuropathic limbs as well as increases in the subject's mobility **after just 14 days of BioMat use.**
- Peer-reviewed studies show far infrared therapy efficacy in the treatment of diabetic neuropathy, arthritis, depression, fibromyalgia, and various types of cancer.
- A report in the Journal of the American Medical Association stated that in a single Infrared Ray sauna session, it is possible to burn an amount of calories equal to the amount burned when **rowing or jogging for 30 minutes.**
- A 2013 medical study shows that when the body temperature is lowered just 1 degree below normal (98.6° F), the immune system is compromised by as much as **40%.**
- The National Cancer Institute states: "Many studies have shown a significant reduction in tumor size when hyperthermia (applying heat such as far infrared) is combined with other treatments."
- In concurrence with a recent Harvard Medical Study, the Advanced Cancer Institute states: "Very high temperatures can kill cancer cells outright."
