

Example of How To Package Brake Boosters for Shipping

Place your order form in a sealed plastic bag

STEP 1: Use the photos below as an example of how to protect your booster core from shipping damage.

STEP 2: After following these steps, place your protected booster in a shipping box and line with packing material under and around the protected unit.

STEP 3: Place padding at the top and bottom and on all sides of the box.

STEP 4: Lay your sealed plastic bag on top which includes your order form and a photo of the contents.

STEP 5: Send us an email with your shipment information at BrakePartsSTOP@AOL.com
