

## Cutwork needle guide for Pfaff, Viking and Bernina

### Pfaff , Viking and Inspira Needles

Pfaff , Viking and Inspira Needles are the same as each other and are completely interchangeable.

Designs made specifically for these needles will either ask you for Cutwork needle (on pfaff creative vision and the viking dimond) or by color on all other machines.

They are color coded as well as numbered.

Each needle has a cutting blade that is angled in a specific way (the angel is depicted , below , after the color)

Needle 1 is red /

Needle 2 is yellow –

Needle 3 is green \

Needle 4 is blue |

### Bernina Needles

Bernina Needles are unique to themselves.

Designs made specifically for these needles will tell you which needle position to use and are usually used in order 1,2,3,4.

On machines other than bernina, refer to the stitching instructions and put in the cutwork needles when requested.

There is only one needle , it is attached to a Wheel that you dial to switch the angle of the blade

(each blade position is numbered from 1 to 4 , the angle is depicted below, after the needle number)

Position 1 is |

Position 2 is /

Position 3 is –

Position 4 is \

#### Bernina Needles with Pfaff & Viking Designs

If the design calls for these colors:

- |          |                        |
|----------|------------------------|
| <b>1</b> | Use Bernina Position 2 |
| <b>2</b> | Use Bernina Position 3 |
| <b>3</b> | Use Bernina Position 4 |
| <b>4</b> | Use Bernina Position 1 |

#### Viking & Pfaff Needles with OESD Designs

If the design calls for this needle position:

- |                              |          |
|------------------------------|----------|
| Bernina Position 1 - Use P/V | <b>4</b> |
| Bernina Position 2 - Use P/V | <b>1</b> |
| Bernina Position 3 - Use P/V | <b>2</b> |
| Bernina Position 4 - Use P/V | <b>3</b> |
