Plak saves membrane

1 Attachment only plak of membrane in embroiders ring and leg the substance to embroider separately on the plakvlies.

2 The pattern on the substance embroiders because plak of membrane is the substance pastes down simply.

3 If you are ready appetite the substance with the pattern separately from the window.

4 You keep this then concerning plak membrane only sit still where is embroidered no longer.

5 Knip now a small bit from the role of plak membrane which exactly even something is larger than the breach.

6 Plak the breach again dense

7 You can embroider now simply again and do not need therefore it complete cut down in the ring to replace. And this way a hope under substance and money saves!
